

BASANTA SHAHI

Mississauga, ON | (+1) 437-545-3543 | Basanta999s@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

- 3+ years of experience as certified ISTQB-CTFL, QA and governance Analyst with testing high-traffic e-commerce and ERP platforms.
- Automated monthly stakeholder reporting using Power BI and Excel, streamlining data aggregation, and saving the team 5+ hours of manual work per week.
- Designed real-time, rule-based QC controls to block 200+ non-compliant listings monthly, resulting in a 25% reduction in policy violations.
- Skilled in Agile delivery, defect lifecycle management, and cross-functional collaboration across development teams.
- Strong soft skills in communication, adaptability, and problem-solving developed through hands-on QA work, customer-facing operations, and fast-paced team environments.
- Fluent in English, Hindi and Nepali.

PROFESSIONAL EXPERIENCE

Customer Service & Operations Associate

May 2024 – May 2026

Frank's Hakka | Mississauga, ON

- Manage daily customer orders and POS transactions, support payroll and scheduling, and help keep front-of-house operations running smoothly.
- Known for staying organized under pressure, asking thoughtful questions, and translating complex issues into clear, actionable updates for both technical and non-technical stakeholders.
- Resolved day-to-day operational issues by coordinating order changes, customer concerns, and process gaps, helping maintain service quality during peak business hours.

Quality Assurance and Governance Analyst

Jun 2019 - Dec 2022

Daraz Kyamu Pvt. Ltd, Nepal

- Owned manual and automated testing across Daraz's e-commerce platform and connected ERP systems like Product Dashboard, Vendor Management, and Seller Portal ensuring quality across critical, revenue-driving workflows.
- Cleaned and standardized bulk product data from CSV exports using Excel Power Query and formula-based checks (XLOOKUP, SUMIFS, COUNTIFS, Text-to-Columns), resolving duplicates, inconsistent attribute formats, and missing fields across thousands of monthly records
- Executed cross-browser, smoke, regression, and UAT cycles across staging and pre-prod environments, collaborating closely with developers to triage and resolve issues quickly.
- Streamlined JIRA workflows and bug templates, producing cleaner defect handoffs and improving tracking efficiency by about 25%.
- Generated monthly stakeholder reports using Power BI and Excel, automating manual data aggregation, and saving the team 5+ hours of manual work per week.

PROJECTS

Stock Price & Revenue Analysis | *Python (yfinance, Beautiful Soup, Pandas, Plotly)*

- Extracted historical share price data through the yfinance API and scraped quarterly revenue

tables from public web sources using BeautifulSoup, then cleaned and reshaped both into Pandas Data Frames.

- Built comparative time-series dashboards in Plotly to plot revenue against share price, producing a repeatable extract, transform, and visualize workflow in Jupyter Notebook.

Car Sales Analysis Dashboard | Microsoft Excel

- Built an interactive dashboard covering 155 vehicle models across 30 manufacturers using structured Tables, calculated fields (IF/IFS), PivotTables, and slicer-linked visualizations.
- Identified that the top 3 brands hold 44.5% of unit sales and that price correlates with resale retention at only 0.17, indicating that brand rather than price drives value retention.

TECHNICAL SKILLS

Data Analysis & Querying:	SQL (MySQL), Microsoft Excel (PivotTables, Power Query, XLOOKUP, SUMIFS, COUNTIFS), data cleaning, data validation, ETL / data preparation, KPI reporting
Data Visualization & BI:	Power BI, Looker Studio, IBM Cognos Analytics, Tableau, IBM Cloud, Generative AI for Data Analytic
Defect Tracking	JIRA and Confluence for ticketing, documentation, and sprint workflows, Trello
