

BASANTA SHAHI

Mississauga, ON | (+1) 437-545-3543 | basanta999s@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Detail-oriented Software QA Analyst with 3+ years of experience in manual and automation testing for web and ERP platforms. I am Skilled in Playwright (JavaScript) for UI automation and for modern browser testing. Strong background in API testing (Postman), CI/CD integration (Jenkins), and Agile delivery. Proven ability to reduce regression cycles, improve software reliability, and collaborate effectively across development teams.

TECHNICAL SKILLS

- Testing & Automation: Manual Testing, Functional, Regression, Smoke, Sanity, UAT, Playwright (JavaScript), Test Case Design & Execution
- API & Web Services: Postman, REST API, JSON, Newman CLI
- Frameworks & Tools: Pytest, Page Object Model (POM), BDD, TDD
- Defect Management Tools: Confluence, JIRA
- CI/CD & Version Control: Jenkins, Git, GitHub Actions
- Languages & Databases: Python, JavaScript, SQL (MySQL, Oracle)
- Methodologies: Agile (Scrum), Cross-Browser Testing, Defect Lifecycle Management, UI/UX Validation

EDUCATION

- **Post-Graduate Certificate** – Full-Stack Software Development | **Lambton College, Mississauga, ON**
- **Bachelor of Science in Computer Science & Information Technology** | **Tribhuvan University, Nepal** | Oct 2014 – Dec 2018 | Accredited by **WES** | Sep 2022 – Apr 2024

PROFESSIONAL EXPERIENCE

Software QA Analyst | Daraz Kaymu Pvt. Ltd. | Kathmandu, Nepal | Jun 2019 – Dec 2022

- Led manual and automated testing for Daraz's e-commerce platform and ERP systems (Product Dashboard, Vendor Management, Seller Portal).
- Participated in Agile ceremonies including stand-ups, sprint planning, and retrospectives.
- Developed and maintained automation frameworks using Playwright (JavaScript), reducing manual testing time by 30%.
- Executed API and database validation to ensure data consistency across pricing, inventory, and product details.
- Conducted cross-browser, smoke, regression, and UAT testing across multiple environments.
- Integrated automated suites into Jenkins CI/CD pipelines, ensuring faster, stable deployments.
- Improved defect tracking and communication efficiency by 25% via structured JIRA workflows.

IT Intern | National Human Rights Commission | Kathmandu, Nepal | Sep 2018 – May 2019

- Designed and developed 1 user-friendly websites using bootstraps and Laravel framework that included customer databases
- Planned website architecture, documented development processes, solutions, and best practices
- Provided technical support for hardware, software, and network issues, serving over 50 users

OTHER EXPERIENCE

Customer Service & Operations Associate | Frank's Hakka | Mississauga, ON | May 2024 – Present

- Manage daily customer orders and POS transactions with precision, ensuring timely service and high satisfaction.
- Oversee payroll and attendance records, maintaining data accuracy and supporting management with scheduling.
- Collaborate with kitchen and front-end teams to streamline operations and resolve issues efficiently in a fast-paced environment.

CERTIFICATIONS

- Web Development – Aptech Computer Education (2017)
- A+ Certification – Aptech Computer Education (2016)

PROJECT HIGHLIGHTS

Playwright E2E Automation Framework (Demo E-Commerce Platform)

- Designed and implemented a scalable Playwright automation framework from scratch using Page Object Model (POM) architecture. ([GitHub link](#))
- Structured project with reusable pages/, tests/, and utils/ modules to ensure maintainability and scalability.
- Implemented data-driven testing (DDT) for authentication and form validation scenarios.
- Automated regression tests include user registration, login, product selection, cart management, checkout, and file uploads.
- Developed and executed API automation tests using Postman, validating CRUD operations, response schemas, status codes, and business rules. ([GitHub Link](#))
- Created Postman Collections with environment variables and automated test scripts using JavaScript assertions.
- Executed API test suits using Collection Runner and Newman CLI for automated runs.
- Enabled parallel execution and cross-browser testing (Chromium, Firefox, WebKit).
- Configured CI pipeline using GitHub Actions for automated UI and API test execution.
- Generated HTML test reports and improved failure debugging with structured logging and assertions.
- Applied GenAI/MCP Servers to generate test scripts, data sets and defect diagnostics
